SUMMARY

SQA Engineer with over 1.5 years of hands-on experience in manual, APIs & automation testing of web applications and websites. Proficient in designing and executing comprehensive test cases, validating UI/UX, and ensuring seamless integration between frontend and backend systems. Skilled in tools like **Cypress**, **Postman**, and **JMeter**, with a strong foundation in C#, .NET, basic knowledge of JavaScript and Agile methodologies. Actively learning **CI/CD** tools such as Docker, Jenkins, Git, and Kubernetes to support continuous testing and faster deployments. Proven ability to enhance software quality, identify critical bugs early and contribute to faster, more reliable releases. Passionate about continuous learning and delivering exceptional user experiences through meticulous QA practices.

WORK EXPERIENCE

BLS Solution

Rawalpindi

SQA Engineer

May 2025 – Present

- Perform **manual testing** of websites and web applications with a focus on functionality and **UI/UX** to ensure seamless user experiences and design consistency.
- Conduct **functional**, **regression**, and **cross platform** testing to ensure product stability and quality.
- Collaborate with developers and designers to identify, report, and track bugs using Trello.
- Design and maintain detailed test cases and documentation to support continuous QA activities.
- Contribute to improving QA processes and ensuring software meets quality standards before release.
- Followed **Agile** methodologies for sprint planning, daily stand-ups, and iterative development, ensuring timely delivery and adaptability.

Cedrus Group Pvt Ltd

Abbottabad

SQA Engineer

Mar 2024 – Present

- Performed manual testing of web applications focusing on functionality, usability, and responsiveness.
- Focused on UI/UX testing to ensure design consistency and user-friendly interfaces across devices.
- Designed and executed detailed test cases ensuring thorough validation of workflows and user scenarios.
- Performed functional, regression, and usability testing to ensure stable and high-quality software releases.
- Collaborated with developers to identify, report, and track bugs using **JIRA**, ensuring timely resolution and smooth delivery.
- Implemented automation testing using **Cypress**, improving test coverage and reducing regression time.
- Performed **API** testing with **Postman** to validate request/response accuracy and backend integration.
- Performed load and performance testing with **JMeter**, identifying potential system bottlenecks under stress.
- Ensured cross-browser compatibility and responsive behavior across multiple screen sizes and environments.
- Contributed to process improvements by maintaining test documentation and following **Agile** practices like sprint planning and daily stand-ups.

PROJECTS

- **Learning Management System (LMS) Application**

Executed manual and automated testing of LMS modules, such as adding questions, assign assessments & search/filter functions, designed detail test cases to ensure functionality, UI consistency, & bug-free releases. Utilized Cypress to automate repetitive scenarios and Postman for API testing, improving testing efficiency and verifying accurate frontend–backend integration for student assessments and reporting.

- **Collect Agent Application**

Performed functional API testing to validate workflows, form validations, and API integrations. Utilized Postman for API testing and JMeter to simulate high-load scenarios, ensuring system performance under stress. Reported and tracked issues using JIRA, contributing to timely resolution and application stability.

- **PastPaperAI Application**

Performed end-to-end testing of the question management, paper generation modules, verifying features such as adding/editing questions, filtering, pagination, and status updates. Tested the complete workflow of creating question papers with various question types.

- **Websites**

Manually tested multiple static and dynamic websites, focusing on UI/UX validation by comparing implemented designs with Figma mockups. Verified responsiveness, layout consistency, and cross-browser compatibility to ensure a seamless user experience across devices, and ensured that websites functioned and looked exactly as designed for ease of use.

TRAINING

UPWARDS (TRAINING PROGRAM)

Nov 2023 – Feb 2024

.NET Development

- Gained hands-on experience in C#, ASP.NET core, Web API, MS SQL Server & some basic React JS.
- Worked on building RESTful APIs, integrating dependency injection, and optimizing database management.
- Gained practical exposure to front-end technologies, including HTML, CSS, JavaScript and React.

SKILLS

Programming Languages & Frameworks

C# | ASP.NET Core | basic JavaScript | HTML & CSS | MS SQL

Testing & QA Tools

Manual Testing | Automation Testing (**Cypress**) | API Testing (**Postman**) | Performance Testing (**JMeter**) | Unit Testing | Test Case Design

Version Control & Methodologies

GitHub | Agile Methodologies | Bug Tracking (JIRA)

Soft Skills

Presentation and Communication | Working under Pressure | Team Management | Problem Solving

EDUCATION

Bachelor's Degree, CS

University of Haripur

2022

LANGUAGE

English | Urdu
